

Time Saver: remove restrictions from multiple PDF files

April 2011. Atomic PDF Password Recovery 3.0 is the latest version of the best solution for lost passwords to PDF files. Version 3.0 gives users the power to process PDF files in batches and supports both RC4 and AES encryption.

The decryption experts at the APASSCRACKER Project have announced the latest version of their solution for PDF users – Atomic PDF Password Recovery 3.0. The software removes restrictions on password-protected PDF files and restores full access to the files.

Atomic PDF Password Recovery 3.0 is based on a proven engine that supports two types of encryption: RC4 and AES. The software instantly removes password restrictions for all PDF files regardless of the complexity of the password or the type of encryption used.

And with batch processing now available in Atomic PDF Password Recovery 3.0, removing PDF restrictions is faster and easier than ever before. Corporate users will appreciate the ease with which Atomic PDF Password Recovery 3.0 handles large numbers of files simultaneously.

The Proven, Affordable Solution

Accent PDF Password Recovery 3.0 runs on all Microsoft Windows operating systems from Windows 95 to Windows 7. A home license costs just \$30, and a corporate license costs \$45.

About the Project

APASSCRACKER projects started in 2002. Its aim was creation of affordable Windows applications that can solve the lost passwords problem. Nowadays about 20 software solutions searching passwords set for well-known applications and files such as Microsoft Office, zip and rar archives, e-mail clients, etc. are available within the framework of the project.
