

Enhance the functions of Adobe PDF quickly & easily!

October 2009: Passcovery Ltd. announces the release of Atomic PDF Password Recovery 2.0 – a software solution for recovery of passwords and removal of restrictions that protect Adobe PDF files. You can instantly access the the enhanced functions of working with PDF files. Our solution supports compressed elements contained in a PDF file.

Passwords and restrictions protecting PDF files limit the possibilities of using a PDF file: it cannot be printed, the content cannot be selected and copied, no comments can be left in it, and the forms comprising the document cannot be corrected and filled out. A password, if it is forgotten or lost, can prevent you from using a PDF document to the utmost.

Atomic PDF Password Recovery developed by Passcovery Ltd. removes the password and restrictions on a PDF document upon opening the file. We guarantee a correct result for PDF version 1.7 (created in Adobe Acrobat 9) or earlier.

The new version includes the support of protected PDF documents, the structure of which comprises compressed objects, such as figures, diagrams, and so forth, and compressed content of the document structure. It provides more compatibility with PDF documents created in Adobe Acrobat 7.0. and later.

The main advantage of Atomic PDF Password Recovery is an instant and guaranteed result. It doesn't matter what package was used to set a password for the PDF document! The password will be removed immediately when the application starts.

Availability and prices

The efficiency of Atomic PDF Password Recovery was tested in all commonly used versions of Microsoft Windows, beginning with Windows 95 and up to Windows 7. A limited-function trial version is available for free, with no strings attached. The cost of the fully functional version license is \$35 US Dollars for business use and \$25 US Dollars for personal use.

About the developer

Passcovery Ltd. proposes software solutions for recovery of lost passwords for the most popular and commonly used documents and applications. Such documents and applications include Microsoft Office documents, zip and rar archives, e-mail clients, and so forth. More information about our applications can be found on our web site.
