

Recover Lost VBA Passwords in Just 20 Seconds

March 2011. APASSCRACKER Project – the developer of innovative password recovery software – releases the new version of Atomic VBA Password Recovery, 2.40.

As always, Atomic VBA Password Recovery 2.40 recovers lost or forgotten VBA passwords to Microsoft Office 95-2003 files **in just three clicks**. The software recovers passwords instantly during the file launch process.

Version 2.40 offers significantly improved compatibility with Microsoft Office 2003 files. In rare cases when a VBA password cannot be recovered immediately, Atomic VBA Password Recovery 2.40 replaces it with a known, pre-installed password and restores access to the VBA code for the file's macros.

Key Advantage

Atomic VBA Password Recovery is 100% guaranteed to provide instant results. The program supports Microsoft Access/Excel/Word 95-2003 files (.mdb, .xls, .doc).

The Proven, Affordable Solution

Accent VBA Password Recovery 2.40 runs on all Microsoft Windows operating systems from Windows 95 to Windows 7. A home license costs just \$30, and a corporate license costs \$40.

About Project

APASSCRACKER Project provides innovative Windows solutions for recovering lost passwords. Today the project offers 20 different password recovery solutions that support most popular formats, including Microsoft Office files, ZIP archives and email clients.
