

New Version, New Features for Atomic VBA Password Recovery

August 2011. Now compatible with Microsoft Office 2007-2010, Atomic VBA Password Recovery 3.0 restores and removes VBA passwords easily and instantly.

The decryption experts at the APASSCRACKER Project have announced the release of a new version of Atomic VBA Password Recovery (AtomicVBA) 3.0, the powerful tool that doesn't require expertise for instant results. AtomicVBA instantly solves the problem of lost VBA passwords for VBA projects created in Microsoft Office.

And now, AtomicVBA 3.0 supports Microsoft Office 2007-2010 files.

The latest version of AtomicVBA is based on a tried-and-true engine that supports all earlier versions of Microsoft Office, from Office 2010 all the way back to Office 95. Atomic VBA Password Recovery 3.0 instantly recovers or deletes lost VBA passwords set by the user who created the VBA project. The AtomicVBA engine's special design slices through passwords of any type or complexity and always guarantees instant results 100% of the time.

Key Advantage

Atomic VBA Password Recovery is 100% guaranteed to provide instant results. The program supports Microsoft Access/Excel/PowerPoint/Word files (.mdb, .pptx, .xls, .doc).

The Proven, Affordable Solution

Accent VBA Password Recovery 3.0 runs on all Microsoft Windows operating systems from Windows 95 to Windows 7. A home license costs just \$30, and a corporate license costs \$45.

About APASSCRACKER

APASSCRACKER Project provides innovative Windows solutions for recovering lost passwords. Today the project offers 20 different password recovery solutions that support most popular formats, including Microsoft Office files, ZIP archives and email clients.
